Working Experience

Database Analyst | NBRO | Remote | Sep-2025 - Feb-2026

Worked as a Database Analyst at the National Building Research Organization (NBRO), responsible for managing and analyzing database systems by organizing data, performing data validation. Supported data accuracy, maintained records, and helped optimize database performance to ensure reliable and efficient information management.

Project Manager | Global Exceed | Remote | May-2026 - Present

Working as a Project Manager at Global Exceed, responsible for planning, coordinating, and monitoring software development projects by managing project requirements, timelines, and deliverables. Coordinate with development, QA, and client teams to ensure project requirements are clearly communicated and successfully implemented. Monitor project progress, support testing and issue resolution, maintain project documentation, and facilitate effective communication with stakeholders to ensure projects are delivered efficiently and according to planned requirements.

Projects

AI-Powered End-to-End Virtual Tour Guide for Solo Travelers in Sri Lanka

Owner & Developer | Ongoing Project

- Developing an intelligent travel planning platform that helps solo travelers explore Sri Lanka efficiently. The system uses AI to generate personalized travel itineraries, recommend destinations, estimate budgets, and provide real-time guidance for transportation, accommodation, and activities. The platform aims to deliver a seamless end-to-end travel experience through a user-friendly web interface.
- Technologies: Next.js, Supabase, Tailwind CSS, Machine Learning

Music Event Planning System | Owner & Developer

- A dynamic, user-friendly platform designed for organizing and promoting live music events. Features include event scheduling, artist profiles, ticket booking, and responsive design. Built with modern web technologies to deliver a seamless experience for both organizers and attendees.
- Technologies: React, Java, SQL, CSS

Online Food Ordering System | Developer

- A modern and responsive web platform developed for Bika Restaurant, enabling customers to browse menus, place online orders, and select pickup or delivery options. The site features a clean UI, Sinhala localization, and seamless navigation to enhance the user's food ordering experience.
- Technologies: React.js, CSS, Firebase

Certifications

- Smart Itinerary Generator for Solo Travelers in Sri Lanka - Student Symposium
- Introduce into Internet of Things Course in Cisco Academy
- CCNAv7: Introduce into Networks Cisco Networking Academy
- INOVERA '25 Software Engineering Project Exhibition

Volunteering

- **Rotaract Club of KDU**
Membership Development Director (2023-2024)
- **Student Symposium Faculty of Computing KDU**
Organizing Committee Member
- **IEEE Student Branch Chapter KDU**
Team Member (2024 - 2025)
